CPSC 304 Project Cover Page

Milestone #: 3

Date: 2025.03.12

Group Number: 90

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
Alexi Manning	58046186	10g8p	aleximanning7@gmail.com
Livia Lin	44851947	k1m7a	livialin2014@gmail.com
Yoobeen Hong	51765535	m2v3m	yoobeenhong@gmail.com

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

Brief Summary of the Project

This database models the elements of the game Minecraft, including blocks, players, achievements, worlds, and servers. It models how the quantity of different types of objects like blocks, recipes, and mobs may change over time as a player plays in a world. It also represents how a world itself may also be part of a larger server, hosted by certain players and enjoyed by other players.

Timeline of the Project Assignments:

Alexi (Purple) Livia (Blue) Yoobeen (Pink) All (White)

Deadlines:

EOD March 24 (Red) — SQL structure deadline
EOD March 31 (Orange) — Code and GUI implementation deadline
10PM April 2 (Yellow) — Documentation, deliverables, and Milestone 4 submission deadline

Tasks:

Task + Details			
SQL Structure Deadline – EOD March 24			
Create 1 sql script file (DROP TABLE at beginning of file, contains enough data for testing and demo, no GUI button required to initialize script setup)			
Code and GUI implementation Deadline – EOD March 31			
Implement INSERT on one relation that contains foreign key			
Specify INSERT input values in GUI			
Handle case where foreign key of inserted tuple does not exist in GUI (error message or insert tuple in other table)			
Implement UPDATE on one relation with 2 non-primary key attributes and 1 of non-primary key attribute with UNIQUE constraint or foreign key			
Display tuples in GUI that users can UPDATE			
Implement DELETE on one relation (should be ON DELETE CASCADE)			
User chooses values to delete in GUI (inputting primary key of tuple, selecting from list of tuples, etc.)			
Implement SELECT on one relation			
Support any number of AND/OR clauses/combinations of attributes in GUI; AND/OR clauses should be implemented as dropdowns			
Implement PROJECT on one relation			

Implement JOIN between at least 2 relations User must provide at least one WHERE clause in GUI Yoobeen Implement AGGREGATION WITH GROUP BY (can be hardcoded) Alexi Provide interface (button, dropdown, etc.) to execute with GROUP BY in GUI Implement AGGREGATION WITH HAVING (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute with HAVING in GUI Livia Implement NESTED AGGREGATION WITH GROUP BY (aggregation occurs in each nested query, GROUP BY only needs to occur in 1; can be hardcoded) Provide interface (button, dropdown, etc.) to execute NESTED in GUI Yoobeen Implement DIVISION (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Poscription of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"				
User must provide at least one WHERE clause in GUI Implement AGGREGATION WITH GROUP BY (can be hardcoded) Alexi Provide interface (button, dropdown, etc.) to execute with GROUP BY in GUI Implement AGGREGATION WITH HAVING (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute with HAVING in GUI Livia Implement NESTED AGGREGATION WITH GROUP BY (aggregation occurs in each nested query, GROUP BY only needs to occur in 1; can be hardcoded) Provide interface (button, dropdown, etc.) to execute NESTED in GUI Yoobeen Implement DIVISION (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Poscription of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Support viewing any number of attributes in GUI	Livia		
Implement AGGREGATION WITH GROUP BY (can be hardcoded) Provide interface (button, dropdown, etc.) to execute with GROUP BY in GUI Implement AGGREGATION WITH HAVING (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute with HAVING in GUI Livia Implement NESTED AGGREGATION WITH GROUP BY (aggregation occurs in each nested query, GROUP BY only needs to occur in 1; can be hardcoded) Provide interface (button, dropdown, etc.) to execute NESTED in GUI Yoobeen Implement DIVISION (can be hardcoded) Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Posciption of how final schema differed from initial schema and why (IF Alexi APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra Livia information"	Implement JOIN between at least 2 relations			
Provide interface (button, dropdown, etc.) to execute with GROUP BY in GUI Implement AGGREGATION WITH HAVING (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute with HAVING in GUI Livia Implement NESTED AGGREGATION WITH GROUP BY (aggregation occurs in each nested query, GROUP BY only needs to occur in 1; can be hardcoded) Provide interface (button, dropdown, etc.) to execute NESTED in GUI Yoobeen Implement DIVISION (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Provide interface (button, dropdown, etc.) to execute NESTED in GUI Alexi initialization (can be modeled in pdf of excel spreadsheet) Livia Alexi information"	User must provide at least one WHERE clause in GUI			
Implement AGGREGATION WITH HAVING (can be hardcoded) Provide interface (button, dropdown, etc.) to execute with HAVING in GUI Livia Implement NESTED AGGREGATION WITH GROUP BY (aggregation occurs in each nested query, GROUP BY only needs to occur in 1; can be hardcoded) Provide interface (button, dropdown, etc.) to execute NESTED in GUI Yoobeen Implement DIVISION (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Implement AGGREGATION WITH GROUP BY (can be hardcoded)			
Provide interface (button, dropdown, etc.) to execute with HAVING in GUI Implement NESTED AGGREGATION WITH GROUP BY (aggregation occurs in each nested query, GROUP BY only needs to occur in 1; can be hardcoded) Provide interface (button, dropdown, etc.) to execute NESTED in GUI Implement DIVISION (can be hardcoded) Livia Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Sanitization (encryption not required) Wiscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Provide interface (button, dropdown, etc.) to execute with GROUP BY in GUI			
Implement NESTED AGGREGATION WITH GROUP BY (aggregation occurs in each nested query, GROUP BY only needs to occur in 1; can be hardcoded) Provide interface (button, dropdown, etc.) to execute NESTED in GUI Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Implement AGGREGATION WITH HAVING (can be hardcoded)			
in each nested query, GROUP BY only needs to occur in 1; can be hardcoded) Provide interface (button, dropdown, etc.) to execute NESTED in GUI Yoobeen Implement DIVISION (can be hardcoded) Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Provide interface (button, dropdown, etc.) to execute with HAVING in GUI			
Implement DIVISION (can be hardcoded) Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Livia Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Implement NESTED AGGREGATION WITH GROUP BY (aggregation occurs in each nested query, GROUP BY only needs to occur in 1; can be hardcoded)			
Provide interface (button, dropdown, etc.) to execute DIVISION in GUI Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Poscription of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Provide interface (button, dropdown, etc.) to execute NESTED in GUI			
Sanitization (encryption not required) Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Poscription of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Implement DIVISION (can be hardcoded)			
Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Provide interface (button, dropdown, etc.) to execute DIVISION in GUI			
value, invalid input data type, etc.) GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Sanitization (encryption not required)			
List of needed SQL queries and where they can be found in code (file name and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Poscription of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Miscellaneous error handling notifications in GUI (e.g. inserting duplicate value, invalid input data type, etc.)			
and line number(s)) For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Pescription of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	GUI notifications about success/failure of INSERT, DELETE, UPDATE and can verify success in GUI			
Documentation, deliverables, and Milestone 4 Deadline – EOD April 2 Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Pescription of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	List of needed SQL queries and where they can be found in code (file name and line number(s))			
Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link) Short description of final project and what it accomplished Pescription of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	For AGGREGATIONS and DIVISION, copy of SQL queries and 1-2 sentences describing what each does			
Short description of final project and what it accomplished Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Documentation, deliverables, and Milestone 4 Deadline – EOD April 2			
Description of how final schema differed from initial schema and why (IF APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Submit Milestone 4 deliverables (cover page, sql script file, and pdf file with repository link)			
APPLICABLE) Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Short description of final project and what it accomplished	Yoobeen		
initialization (can be modeled in pdf of excel spreadsheet) README file in repository that provides extra information or "No extra information"	Description of how final schema differed from initial schema and why (IF APPLICABLE)			
information"	Copy of schema and screenshots showing data in each relation after SQL initialization (can be modeled in pdf of excel spreadsheet)			
ANII (O L ((E) (ED) (ONE MUOT DO)	README file in repository that provides extra information or "No extra information"			
Milestone 6 peer and self-evaluation (EVERYONE MUST DO) ALL	Milestone 6 peer and self-evaluation (EVERYONE MUST DO)
